LaCie

lightScribe DIRECT DISC LABELING

- Burn customized video DVDs
- Store photos, MP3s and videos
- Burn labels directly onto discs
- Compatible with Mac, Windows, Linux

NEW LIGHTSCRIBE DISC LABELING

This drive is equipped with LightScribe - an innovative new technology that allows you to burn silkscreen-quality labels directly onto CDs and DVDs with a laser instead of a printer. LightScribe uses a combination of your CD/DVD drive and specially coated discs to produce precise, professional labels. The result is an impressive iridescent image composed of art, text, or photos of your own creation.

STORE 8.5GB ON A SINGLE-SIDED DISC

With up to 8.5GB of space on a single-sided, double layer DVD disc, save up to 16 hours of VHS video, 4 hours of personal, high-quality DVD video or thousands of MP3s. Large-capacity, double layer DVD media is also ideal for backing up computer systems.

BROAD COMPATIBILITY

This rewritable drive can also be connected to just about any PC or Macintosh computer, making it the most versatile drive around. Compatible with virtually all DVD players, completed DVDs can be played back to share with family and friends. Write to DVD-R/RW, DVD+R/RW, CD-R/RW and DVD±R double layer media.

FULL-FEATURED SOFTWARE SUITE

An easy-to-use interface allows you to piece together Hollywood-style DVD movies in a matter of minutes complete with menus, thumbnails and backgrounds for a totally customized DVD. Complete software suites include label creation software for Mac, Windows and Linux.
